# How To Setup Ubuntu Virtual Machine with Xen Hypervisor

How To Setup Ubuntu Virtual Machine with Xen Hypervisor

\* First setup Ubuntu 12.04 VM

# Installing Xen

=======

1)

Install a 64-bit hypervisor

#sudo apt-get install xen-hypervisor-amd64

2)

Modify GRUB to default to booting Xen.

#sudo sed -i 's/GRUB\_DEFAULT=.\*\+/GRUB\_DEFAULT="Xen 4.1-amd64"/' /etc/default/grub #sudo update-grub

3)

Set the default toolstack to xm (aka xend).

#sudo sed -i 's/TOOLSTACK=.\*\+/TOOLSTACK="xm"/' /etc/default/xen

4)

#### Reboot

#sudo reboot

5)

Verify that the installation has succeeded.

#sudo xm list

6)

## **Network Configuration**

sudo xm list

ERROR: Can't find hypervisor information in sysfs!

edit and uncomment in /etc/xen/xend-config.sxp [(xend-unix-server no) --> to YES and remove comment]

-then restart and choose xen from the grub

Tejas rawal August 30, 2014 at 1:42 PM

still no success!
